

Adventure

(technical specification)

J2683

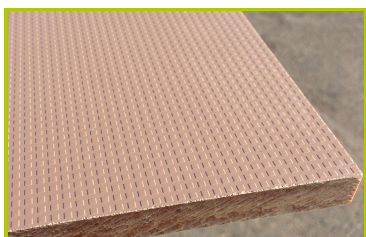

1- **The 125mm diameter posts** are made of painted galvanised steel. The grained finish has a slightly undulating surface for increased scratch resistance.

2- **The 95 x 95mm posts** are made of painted galvanised steel, ensuring robustness and durability. The caps are made of injection moulded polyamide.

3- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

4- **The platforms and the climbing walls** are made from a 12.5mm thick textured and non-slip compact material (HPL).

5- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

6- **The 16mm diameter ropes** are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

7- The slide is made of rotomoulded polyethylene.

8- The ladder rungs are made of acacia wood which is naturally rot-resistant and smooth to the touch.
They are mounted on a 16mm diameter polyester cable.

9- The climbing holds are made of polyamide for its strength and rigidity.

10-The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
